Darío Barros Ramírez: Civil Engineer Pontificia Universidad Católica de Chile. More than 20 years of experience in the construction sector. Former Chairman of Echeverría Izquierdo Montajes Industriales S.A.

CEO Compensation - Long-Term Performance Alignment

Echeverría Izquierdo and its subsidiaries have economic incentive plans in place for all their executives and professionals. These incentives are associated with performance and results. They are determined by management indicators and meeting individually defined goals. Additionally, a stock option program has been implemented to acquire shares in EISA as part of certain executives' compensation plan. Our longest performance period applied to evaluate variable compensation in our executive compensation plan is 3 years. There are no clawback provisions and the longest time vesting period for variable CEO compensation is 3 years.

RISK & CRISIS MANAGEMENT

Risk Governance

Our CFO is the highest-ranking person with dedicated risk management responsibility on an operational level. Our Audit Manager is the highest-ranking person with responsibility for monitoring and auditing risk management performance on an operational level. Both report to CEO and Board's Risk Committee.

The member of our Board with greater experience in Management Risk is Marcelo Awad, who also oversees our cybersecurity strategy. He has participated in presentations on Risk Management and Control given by EY and Price Waterhouse Coopers. He was also the Chairman of the Risk Committee as a Director at CAP S.A for two years and a member of the Risk and HSE Committee of Finning International, Canada.

For our Executive Management Responsibility in Cybersecurity our organisation has a defined role of Chief Information Security Officer (CISO, who reports directly to the Executive Management team and is responsible for overseeing cybersecurity within the company.

The sustainable development of Echeverría Izquierdo's business involves a comprehensive look at different variables. The behavior of these can determine effects both on profitability, liquidity, financing, and other financial indices, as well as on the growth perspective, long-term development and relationship with the company's environment.

A strategic look requires periodically evaluating the risks of the business, the industry and the market in which the activity is carried out, such as levels of employment and job availability, access to financing, regulations and regulatory changes, investment, inflation, safety, health and risk prevention, among others.

For sustainable growth in the long term, Echeverría Izquierdo evaluates and weighs the emerging risks that could have a significant impact on the operation and the business. In the current context of political uncertainty (regulatory and constitutional changes), a sharp drop in stock indices, a significant increase in the value of some inputs and commodities, and a drop in private investment, the company is exposed to two emerging risks:

- Risk of tax impact on mining operations (legislative discussion to increase mining royalty in Chile).
- Risk that economic crisis impacts the ability to purchase real estate (Chile and Peru).

These risks are evaluated based on the current activity and the company's strategy, raising awareness about a long-term horizon.

The company has also revised the main issues that according to internal and external views have the higher potential to impact the business. The 3 main material issues are:

Occupational Health and Safety

According to the ILO, in the construction sector, at least 108,000 workers die in the workplace each year, a figure that represents about 30 percent of all fatal labor-related injuries. The high figures are mainly explained by the multiple risks to which our employees are exposed throughout their daily activities, such as working at heights, exposure to dust, uncomfortable positions, heavy loads, amongst

ECHEVERRIA IZQUIERDO

many others. As a company, we are aware of these risks, and we understand that for our business, it is vital to generate a comprehensive management system that ensures the care, safety and integrity of employees, because otherwise, our operations cannot have an adequate level of functioning. By not addressing this problem, instead, we endanger the lives of workers, also exposing us to legal, reputational and operational risks that may well undermine the continuity of our business.

- Customer and user satisfaction: Meeting customer expectations and delivering projects with a high standard of quality is key for our revenue growth. Focusing and s continuing improving our quality standards have resulted in long- term relations with the most important property developers in the industry, getting to involve them early on in projects to contribute its experience in optimising and limited the risks of variations in costs and deadline.
- Innovation in our construction processes

At Echeverria Izquierdo, we understand innovation as a unique drive to differentiate ourselves in the business. Studies show that productivity in the construction industry has been stagnant for the past 20 years. Innovation is an opportunity to take off from being a mere commodity to offer services with an added value, depending less on raw materials and labour. We face two main challenges; firstly, industrialization, that is, how we are able to bring the largest number of items that are normally carried out on site to a factory. Then, there is digitization: how we take advantage of existing technologies to incorporate them into our processes, make sense of them and add value to make more efficient decisions and generate a more productive culture.

CODES OF BUSINESS CONDUCT

Codes of Conduct: Systems/Procedures

Anticompetitive practices: In the last 4 fiscal years we have had 0 fines, settlements nor pending investigations related to anti-trust/anticompetitive practices against our company.

Corruption and Bribery: In the last 4 fiscal years we have had 0 confirmed substantiated cases of corruption or bribery nor ongoing external investigations by local or international authorities against our company.

Reporting on Breaches.

3 breaches of the Code of Ethics were reported in 2020. Actions were taken for all the cases. The status to the date of the 3 breaches is closed. The first case corresponds of attempt of bribery from a specific provider to a worker of our company. The actions taken were ending the contract with the provider, not hiring new services from it, a report to the Public Ministry, and other internal administrative measures. The second case was a conflict of interest. The actions taken were ending relationships with the parts involved and other internal administrative measures. Last case was a possible non-compliance regulatory issue. A warning letter was issued, and other administrative measures were taken.

CONTRIBUTIONS

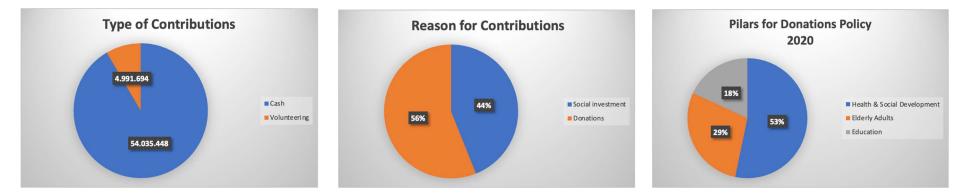

Contributions to trade associations, think tanks or tax exempt-groups

| | 2017 (CLP) | 2018 (CLP) | 2019 (CLP) | 2020 (CLP) |
|--|------------|-------------|-------------|-------------|
| Contributions to trade associations or tax-exempt groups | 61.279.486 | 111.902.107 | 151.496.193 | 102.573.245 |

EISA or any of its subsidiaries have not made any contributions to political campaigns, representation of interests or similar local, regional or national political campaigns / organizations / candidates or others (for example: expenses related to ballot measures or referendums).
